Averlea Community Care

Caring for the Elderly & the Disabled in the Community

Independence In Your Own

Averlea Community Care aims to promote your independence by providing professional care and support in your own home. With a team of friendly and dedicated Care Assistants, Averlea Community Care can provide a 'TAILOR MADE' Care Package, to suit each individual Clients needs.

The Community Care side of the Company has been running since 1993 and today it is managed by it's first Care Assistant. It mainly covers the areas shown in the map on the back page, but will take Client's in other areas a little further away. In the right circumstances funding can be arranged through Social Services, or could be arranged privately by a Client, or Client's family.

Services Available

Personal Care

Includes help with, washing, dressing, getting to and from the toilet. Maybe a Client would like help with a bath or a shower, or just to be taken shopping. We can also monitor and give help with the administering of medication.

Domestic Services

Would include shopping, washing in your own home, ironing, cleaning, dusting, polishing etc.

Meals Delivery Service

Averlea Community Care also runs a service which can deliver a hot meal with a pudding to your door at a competitive price. Meals are delivered by trained Care Assistants who can also check on a Client's welfare.

Night Service

Averlea Community Care can provide a Care Assistant who will stay throughout the night in a Clients home. A Care Assistant can be provided to sleep at a Client's home, alternatively a Care Assistant can be provided to stay awake all night, if required.
